Subject Index

Acanthocheilonema perstans, and pleural effusion, 166
Acetylcholine receptors, alteration in experimental Chagas' disease, 460
Acquired immune deficiency syndrome, stool examination for cryptosporidiosis in homosexual men with diarrhea, 824
Acyclovir, topical, in the treatment of recurrent herpes simplex genitalis, 336
Adenovirus
  type 7b, outbreak of infection in a children's hospital, 814
  type 37, an outbreak of keratoconjunctivitis in an ophthalmologist's office, 191
Adherence factor, mucosal, genetic transfer from enteropathogenic *E. coli* into *S. flexneri* and phenotypic suppression, 711
Adherence
  role of flagellum of *V. cholerae*, 864
  significance of the slime agglutinin as mediator of in vitro attachment, 873
Aerosols, of concentrated water from a hospital with nosocomial Legionnaires' disease, pneumonia in exposed guinea pigs, 129, 1128
Agglutination, bacterial, and enzyme-linked immunosorbent assay in the serologic diagnosis of pertussis, 252
Agglutinin
  against *B. pertussis*, in a Chicago population, 959
  slime, role as mediator of in vitro attachment of *V. cholerae*, 873
"Alice in Wonderland" syndrome, in a patient with infectious mononucleosis, 782
Aminoglycosides, influence on the nephrotoxicity of *cis*-diamminedichloroplatinum, 363
Amoxicillin, successful single-dose prophylaxis against experimental streptococcal endocarditis, 568
Amphotericin B
  liposome-encapsulated, treatment and prophylaxis of disseminated infection due to *C. albicans* in mice, 939
  methyl ester, toxic effects, 784, 785
  penetration into the human eye, 164
  tolerance, a characteristic of *C. parapsilosis* not shared by other *Candida* species, 116
Ampicillin
  resistance of *H. influenzae* correlated with biotype, 800
  C. difficile-associated ileocecitis, intestinal β-lactamase activity, 227
Antagonism, of toxigenic *C. difficile*, by nontoxigenic *C. difficile*, 733
Antibiotic-induced injury, and ischemia in the rabbit kidney, 341
Antibiotic prophylaxis, and alteration of staphylococcal flora in cardiac surgery patients, 642
Antibodies
  hybridoma, analysis and selection for typing isolates of herpes simplex virus, 593
  IgM and IgG, response to teichoic acid in infections due to *S. aureus*, 1101
  monoclonal
    antigenic typing and rapid diagnosis of infection due to herpes simplex virus, 829
    distribution of antigens in the brains of mice with Sendai virus infection, 297
  naturally acquired, to tetanus toxin in humans and animals from the Galápagos Islands, 308
  response
    to cytomegalovirus after renal transplantation, 40
    to peptidoglycan during staphylococcal infections, 16
    to streptococcal M proteins in humans, 1
  specific monoclonal, rapid diagnosis of pneumonia due to cytomegalovirus, 1119
  to capsular polysaccharide of *H. influenzae* type b
    protective level, 1100
    relation between natural human mucosal and serum antibody, 787
  to *C. immitis*, detected in serum by solid-phase radioimmunoassay, 32
  to cytomegalovirus, serologic survey in women and infants in Lima, Peru, serologic survey, 777
  to human kidney antigen, in the urine of patients with urinary tract infections, 434
  to mannose-sensitive pili of *E. coli*, antibacterial mechanisms, 882
  to measles virus, a new solid-phase enzyme-linked immunosorbent assay, 1055
  to *P. aeruginosa*, in immune globulins prepared for intravenous use in humans, 1090
  vaccine-induced, to polysaccharides of group B streptococci, quantitation in human serum, 847
Antigen
  cryptococcal, diagnostic value of test, 173, 174
  histocompatibility leukocyte
    in control of differential resistance to paralytic poliomyelitis, 422
    in patients with toxic-shock syndrome, 783
  human kidney, antibody in the urine of patients with urinary tract infections, 434
  legionellaceae, reactivity of serum from patients with suspected legionellosis, 23
  Sendai virus, in the brains of mice, studied with monoclonal antibodies, 297
Antigen-specific immunofluorescence, characterization of *B. fragilis* strains, 780
Antigenic analysis, of strains of Ebola virus, identification of two serotypes, 268
Antigens, O and rough, protection against endotoxin of *S. minnesota* by antisera, 57
Antiherpes drugs, comparative efficacy against various strains of varicella-zoster virus, 576
Antimicrobial agents, and antimicrobial combinations, spectrophotometric assessment of dose-response curves, 758
Antimicrobial prophylaxis
  against infection in neutropenic patients, 611
  cost effectiveness in clean vascular surgery, 1103
Antisera, to thermostable direct hemolysin and cholera enterotoxin, failure to prevent fluid accumulation, 779
Antitoxin responses, serologic differentiation between infection with *V. cholerae* and enterotoxin-producing *E. coli*, 514

Arabinitol/creatinine ratios, and serum arabinitol concentrations in invasive candidiasis, 504
Ascitic fluid, from cirrhotic and noncirrhotic patients, bactericidal and opsonic activity, 1011
Aspergillus fumigatus hyphae, mechanisms of destruction mediated by human monocytes, 474
Azlocillin, as therapy for acute exacerbations of cystic fibrosis, 559
Bacteroides fragilis, characterization of strains based on antigen-specific immunofluorescence, 780
Bacteroides species, genetic analysis of clindamycin resistance, 551
Bacteremia
  due to *S. aureus*, treatment with vancomycin and β-lactam antibiotics, 137
  due to *S. faecalis*, complicating pseudomembranous colitis, 165
  postextraction, due to penicillin-resistant strains of viridans streptococci, in children with cardiac disease, 133
  prediction by surveillance cultures in neutropenic patients treated in a protective environment, 789
Bacterial isolation, comparison with cytotoxicity assay and counterimmunoelectrophoresis for detection of *C. difficile*, 778
Bactericidal and opsonic activity, of ascitic fluid from cirrhotic and noncirrhotic patients, 1011
Bacteriuria, in infections due to *S. haematobium*, 960
Bangladesh, plasmid-borne drug resistance among *V. cholerae* serogroup O1, biotype El Tor, in a point-source outbreak, 204
Bile, effect of typhoid fever on acid pool size and composition, 361
Biotype
  and serotype distribution, of clinical isolates of *C. jejuni* and *C. coli* over a three-year period, 243
  correlation with virulence and ampicillin resistance in *H. influenzae*, 800
Birds, resistance to infection by *C. psittaci* of mammalian origin, 162
BK virus, and JC virus, persistence of DNA sequences in normal human and diseased tissues, 676
Bone and joint infections, fungal, treatment with ketoconazole, 1064
Bordetella pertussis
  enzyme-linked immunosorbent assay and bacterial agglutination in serologic diagnosis, 252
  presence of specific agglutinin in a Chicago population, 959
Borrelia recurrentis, Jarisch-Herxheimer–like reaction in infected men treated with tetracycline and penicillin, 898
Brain, as site of *M. pulmonis* infection in rodents, 540
Brucella melitensis, presence of granulomas in hepatitis, 606
Brucellosis
  and pancytopenia due to hemophagocytosis, 445
  chronic, conventional therapy and levamisole in management, 1123
Camplyobacter coli
  and *C. jejuni*, serotypes in bacteremic, hospitalized children, 592
  serotype and biotype distribution of clinical isolates over a three-year period, 243
Campylobacter jejuni
  and *C. coli*, serotypes in bacteremic, hospitalized children, 592
  incidence of plasmid DNA in strains isolated from stool specimens at 37 C and 43 C, 965
  serologic study of two clusters of infection, 820
  serotype and biotype distribution of clinical isolates over a three-year period, 243
Campylobacteriosis, human, the pet hamster as a potential reservoir, 784
Canada, diarrhea among infants and young children, 685
Cancer
  and zoster in children, radioimmune precipitation profiles of sera before and after illness, 47
  influence of aminoglycosides on the nephrotoxicity of *cis*-diamminedichloroplatinum, 363
Candida albicans
  confirmation of corticosterone and progesterone binding activity, 359
  mouse model of systemic infection, flucytosine therapy, 1070
  pathogenicity for oral mucosa, strain-related differences, 1036
  treatment and prophylaxis of disseminated infection in mice with liposome-encapsulated amphotericin B, 939
  two cases of endocarditis discovered at autopsy, 1122
  use of ketoconazole to control systemic spread in mice treated with cytarabine, 946
Candida parapsilosis, amphotericin B tolerance, a characteristic not shared by other *Candida* species, 116
Candida species, adherence to intravenous catheters, 594
Candidasis
  and ketoconazole, a controlled study, 1060
  invasive, serum arabinitol concentrations and arabinitol/creatinine ratios, 504
  systemic, flucytosine therapy, correlation of in vitro susceptibility with in vivo response in mice, 1070
Capsular polysaccharide, of *H. influenzae*, protective level of serum antibodies, 1100
Cardiac disease in children, postextraction bacteremia and penicillin-resistant strains of viridans streptococci, 133
Cardiac transplant recipients, role of the donor heart and immunosuppressive therapy in infections due to herpesvirus, 974
Catheters, intravenous, adherence to *Candida* species, 594
Cephalosporins
  expanded spectrum, novel resistance, 585
  injury in the rabbit kidney and ischemia, 341
  in vivo selection of resistance by *E. cloacae*, 590
  third generation, resistance of methicillin-resistant *S. aureus*, 591
Chagas' disease, alterations in acetylcholine receptors, 460
Cheese, made from raw milk, 786
Chemiluminescence, particle-induced, stimulation in human polymorphonuclear leukocytes by staphylococcal α-toxin, 729
Chemotaxis
  impaired, cimetidine in treatment of hyperimmunoglobulinemia E, 1121
  neutrophil, a simplified under-agarose method for measuring neutrophil chemotaxis, 1104

Chlamydia psittaci of mammalian origin, resistance of wild birds to infection, 162
Chlamydia trachomatis, pharyngitis and urethritis, 364
Cholera enterotoxin, and thermostable direct hemolysin, failure of antisera to prevent fluid accumulation, 779
Cimetidine, treatment of hyperimmunoglobulinemia E with impaired chemotaxis, 1121
Circulating immune complexes
and ocular and systemic complications of diethylcarbamazine therapy for onchocerciasis, 890
and rheumatoid factors, in visceral leishmaniasis, 1102
Cirrhosis, bactericidal and opsonic activity of ascitic fluid, 1011
Clindamycin resistance, genetic analysis in *Bacteroides* species, 551
Clostridium difficile
a case of splenic abscess, 1105
ampicillin-induced ileocecitis, intestinal β-lactamase activity, 227
comparison of bacterial isolation, cytotoxicity assay, and counterimmunoelectrophoresis in detection, 778
toxigenic antagonism of toxigenic by nontoxigenic *C. difficile*, 733
Clostridium perfringens, food poisoning in the United States, 167
Coccidioides immitis
detection of serum antibodies by solid-phase radioimmunoassay, 32
factors affecting the host-parasite interaction, 372
Colony type, transparent, and outer membrane proteins, association with virulence of *N. meningitidis*, 282
Conjunctivitis, acute hemorrhagic, associated with polio-like motor paralysis, 660
Coproantibodies, and immune complexes, production in piglets infected with rotavirus, 293
Corticosterone, and progesterone, confirmation of binding activity in *C. albicans*, 359
Corynebacterium CDC group G2, endocarditis, first report, 1106
Corynebacterium hofmannii, complication of systemic lupus erythematosus by pulmonary infection, 962
Cost effectiveness, of antimicrobial prophylaxis in clean vascular surgery, 1103
Counterimmunoelectrophoresis, comparison with bacterial isolation and cytotoxicity assay for detection of *C. difficile*, 778
Creatinine, and ratios of arabinitol, in invasive candidiasis, 504
Cryptococcal antigen test, diagnostic value, 173, 174
Cryptosporidiosis, three-step stool examination in homosexual men with diarrhea, 824
Cystic fibrosis
clinical and bacteriological responses to three antibiotic regimens for acute exacerbations, 559
proteases of *P. aeruginosa*, 744
Cytarabine, control of systemic spread of *C. albicans* with ketoconazole during treatment of mice, 946
Cytomegalovirus
antibody response after renal transplantation, 40
effects of vaccine on T-lymphocyte subsets and proliferative responses, 958
enhancement of infection during pregnancy in guinea pigs, 990
infections, in cardiac transplant recipients, role of the donor heart and immunosuppressive therapy, 974
pneumonia, rapid diagnosis with specific monoclonal antibodies, 1119
serologic survey of antibodies in women and infants in Lima, Peru, 777
Cytoplasmic tubular alterations, chimpanzees infected with blood-borne non-A, non-B hepatitis, 535
Cytotoxicity
assay, comparison with bacterial isolation and counterimmunoelectrophoresis for detection of *C. difficile*, 778
natural killer, stimulation by recombinant human leukocyte interferon, 484
Diabetes, virus induced, role of interferon, 155
Dialysis, chronic peritoneal, antibacterial activity of peritoneal macrophages and opsonins, 1018
cis-Diamminedichloroplatinum, influence of aminoglycosides on nephrotoxicity in cancer patients, 363
Diarrhea
among infants and young children in Canada, 685
superinfection, and hemorrhage associated with the use of moxalactam, 171, 172
Diethylcarbamazine, in onchocerciasis therapy, relation of ocular and systemic complications to circulating immune complexes, 890
Dipethalonema perstans, and pleural effusion, 166
DNA
nonintegrated, from JC papovavirus, distribution in organs of patients with progressive multifocal leukoencephalopathy, 669
plasmid, incidence in strains of *C. jejuni* isolated from stool specimens, 965
sequences, of BK and JC viruses, persistence in normal human tissues and diseased tissues, 676
Dosing
once daily vs. continuous, relation to efficacy and toxicity of gentamicin, netilmicin, and tobramycin, 918
relation of interval to activity of gentamicin and ticarcillin against *P. aeruginosa* in granulocytopenic mice, 910
Ebola virus
antigenic analysis of strains, identification of two serotypes, 268
biologic differences between strains from Sudan and Zaire, 264
comparative analysis of structural polypeptides of strains from Sudan and Zaire, 276
oligonucleotide mapping of RNA, evidence for two subtypes, 272
Echovirus, type 9, age dependence of paralysis in infant mice, 999
Editorial, antimicrobial prophylaxis against infection in neutropenic patients, 611
Electrophoresis, isoenzyme, use in differentiation of Neisseriaceae, 247
Encephalitis, induced by hamster neurotropic measles virus, antibody-mediated modification, 546
Endocarditis
due to *C. albicans*, two cases discovered at autopsy, 1123

due to *Corynebacterium* CDC group G2, first report, 1106
streptococcal, successful single-dose amoxicillin prophylaxis, two mechanisms of protection, 568
Endotoxin
challenge, protection by antisera and immunization with rough mutants of *S. minnesota*, 57
staphylococcal, protection against pyrogenic exotoxin-enhanced lethality with methylprednisolone and IgG, 358
Enterobacter cloacae, in vivo selection of resistance to multiple cephalosporins, 590
Enterococci, high-level resistance to gentamicin in clinical isolates, 751
Enteropathogenic *E. coli*, summary of a workshop, 1008
Enterotoxigenic *E. coli*, vaccine based on synthetic heat-stable toxin linked to the B subunit of heat-labile toxin, 318
Enterotoxin, heat-stable, of *E. coli*, effect on cultured mammalian cells, 450
Enzyme-linked immunosorbent assay
and radioimmunoassay, use in serologic diagnosis, 258
bacterial agglutination in the serologic diagnosis of pertussis, 252
differential diagnosis of active pulmonary tuberculosis in humans, 523
for specific antibodies to measles virus, 1055
quantitation of polysaccharides of group B streptococci in human serum, 847
Epidemiology
hospital outbreak of multiresisstant *S. typhimurium* belonging to phage type 193, 210
nosocomial infection and death in a neonatal intensive care unit, 635
of human T-cell leukemia/lymphoma virus, 406
of infection due to adenovirus type 7b in a children's hospital, 814
of infection due to *M. fortuitum* after augmentation mammaplasty, 427
of influenza A virus, individuals infected with two subtypes in the same season, 120
serologic study of two clusters of infection due to *C. jejuni*, 820
source of infection due to hepatitis B virus in Greece, 987
Epstein-Barr virus, persistent infection and pregnancy, 982
Erythrocebus patas monkeys, interferon prophylaxis against simian varicella, 149
Erythromycin, penetration to middle ear fluid of patients with chronic serous otitis media, 1126, 1127
Escherichia coli
and *V. cholerae*, serologic differentiation between antitoxin responses to infection, 514
antibacterial mechanisms of antibody to mannose-sensitive pili, 882
effect of heat-stable enterotoxin on cultured mammalian cells, 450
enteropathogenic
genetic transfer of a mucosal adherence factor into *S. flexneri*, 711
summary of a workshop, 1008
enterotoxigenic, vaccine based on heat-stable toxin linked to the B subunit of heat-labile toxin, 318
inhibition of isolation in blood cultures by trimethoprim-sulfamethoxazole, 964
K1-positive, immunotherapeutic approaches for the potential treatment of infections, 68
Etiology, of epidemic hemorrhagic fever with renal syndrome, 654
Exopolysaccharide, mucoid, of *P. aeruginosa*, immunochemical characterization, 494
Exotoxin type C, staphylococcal
influence of physical and chemical factors on production, 236
role of alteration of immune function in toxic-shock syndrome, 391
Eye
human, penetration of amphotericin B, 164
rabbit, effects of continuous and intermittent systemic administration on the penetration of gentamicin, 144
Fever, louse-borne relapsing, Jarisch-Herxheimer–like reaction in men treated with tetracycline or penicillin, 898
Flagellum, role in adherence of *V. cholerae*, 864
Flucytosine therapy, for systemic murine candidiasis, correlation of in vitro susceptibility with in vivo response, 1070
Food poisoning, due to *C. perfringens*, in the United States, 167
Fungal hyphae, inhibition of monocyte-mediated damage by steroid hormones, 160
Fungal infections, in the bones and joints, treatment with ketoconazole, 1064
Galápagos Islands, naturally acquired antibodies to tetanus toxin in humans and animals, 308
Genetic analysis, of clindamycin resistance in *Bacteroides* species, 551
Genetic transfer, of a mucosal adherence factor from enteropathogenic *E. coli* into *S. flexneri*, 711
Genetic transformation test, for diagnosis of gonorrhea, 1124, 1125
Genital infection, primary and recurrent, with herpes simplex virus types 1 and 2, 163
Genital mycoplasmas, in amniotic fluid from patients with intra-amniotic infection, 650
Genitourinary tract infections, maternal, outcome of pregnancy, 596
Gentamicin
effects of continuous and intermittent systemic administration on penetration into infected rabbit eyes, 144
high-level resistance in clinical isolates of enterococci, 751
relation of dosing intervals to activity against *P. aeruginosa* in granulocytopenic mice, 910
relation of efficacy and toxicity to once-daily vs. continuous dosing, 918
Giardia lamblia
infection of Mongolian gerbils, 222
infection of suckling mice, 217
Glucose-6-phosphate dehydrogenase, deficiency in male patients with Mediterranean spotted fever in Sardinia, 607
Gonorrhea, genetic transformation test for diagnosis, 1124, 1125
Granulocytopenia, selective antimicrobial modulation as prophylaxis against infection, 624
Granulomas, due to *B. melitensis*, in patients with hepatitis, 606
Greece, source of infection due to hepatitis B virus, 987

Guinea-Bissau, measles mortality, state of nutrition, and family structure, 693
Guinea pigs, enhancement of cytomegalovirus infection during pregnancy, 990
Haemophilus influenzae
correlation of biotype with virulence and ampicillin resistance, 800
nontypable, subtyping system based on outer-membrane protein, 838
penetration of erythromycin to middle ear fluid of patients with chronic serous otitis media, 1126, 1127
type b
protective level of serum antibodies to the capsular polysaccharide, 1100
relationship between human mucosal and serum antibody to capsular polysaccharide, 787
Hamster, pet, as a potential reservoir of human campylobacteriosis, 784
Hematuria, in infections due to *S. haematobium*, 960
Hemolysin, thermostable direct, and cholera enterotoxin, failure of antisera to prevent fluid accumulation, 779
Hemophagocytosis, and pancytopenia in patients with brucellosis, 445
Hemorrhage, diarrhea, and superinfection associated with the use of moxalactam, 171, 172
Hemorrhagic fever, epidemic, with renal syndrome, etiologic studies, 654
Hepatitis
attitudes toward vaccination among high-risk hospital employees, 1120
presence of granulomas due to *B. melitensis*, 606
Hepatitis A and B, prevalence of markers in the Shanghai area, 360
Hepatitis B surface antigen, postnatal infectivity of carrier mothers, 185
Hepatitis B virus
infection in Greece, 987
vaccine, efficacy in chimpanzees given transfusions of highly infective blood, 327
use and interpetation of results using inocula with known infectivity titers, 531
Hepatitis, non-A, non-B, evaluation of the specificity of an immunoprecipitin test, 702
Herpes simplex genitalis, recurrent, treatment with topically administered acyclovir, 336
Herpes simplex virus
analysis and selection of hybridoma antibodies for typing isolates, 593
protection of mice from infection by recombinant human leukocyte interferon, 484
type 1
infected fibroblasts, correlation of low natural killing with herpesvirus infections, 1030
intracerebral inoculation of mice with thymidine kinase-deficient mutants, 956
types 1 and 2, primary and recurrent concomitant genital infection, 163
use of monoclonal antibodies in antigenic typing and rapid diagnosis, 829
Herpesvirus infections
correlation with low natural killing of fibroblasts infected with herpes simplex virus type 1, 1030
in cardiac transplant recipients, role of the donor heart and immunosuppressive therapy, 974
Histocompatibility leukocyte antigen
in patients with toxic-shock syndrome, 783
in the control of differential resistance to paralytic poliomyelitis, 422
Host-parasite interaction, factors in coccidioidomycosis, 372
Human T-cell leukemia/lymphoma virus
epidemiology, 406
the retrovirus of adult T-cell leukemia/lymphoma, 399
